compromise
borders**

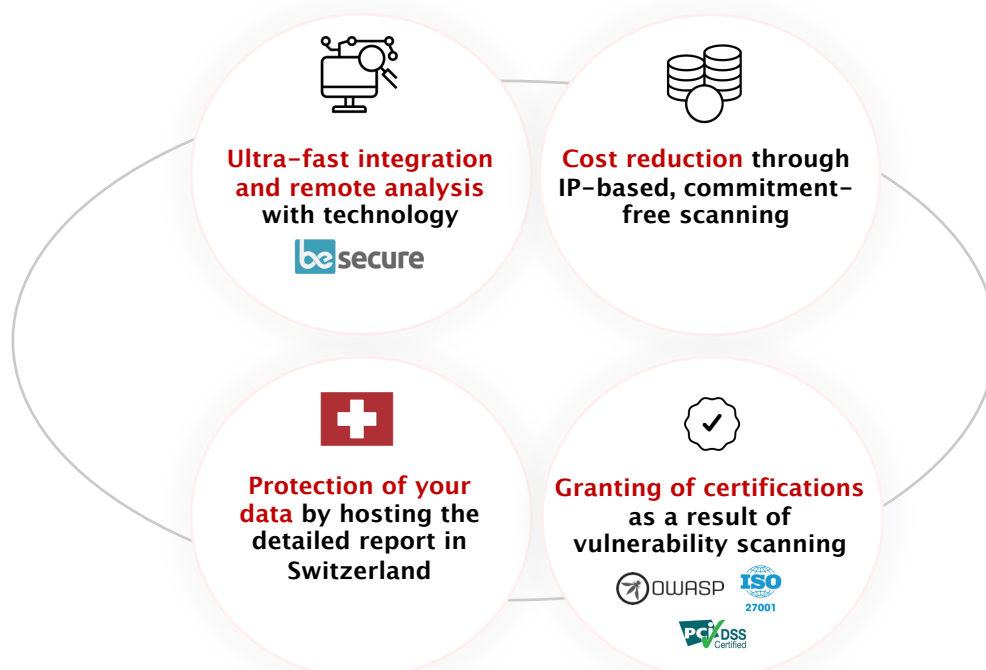

About: UBCOM is a Swiss strategic cybersecurity and secrecy protection agency, founded in 2014. UBCOM acts in cyber risk prevention and protects the tactical and strategic information asset of companies. The agency offers concrete solutions in cyber defence, secrecy protection and digital sovereignty. Its mission is to protect the economic interests of international players in the global marketplace against economic intelligence and corporate spying.

ASSESS YOUR VULNERABILITIES QUICKLY TO BETTER PROTECT YOURSELF

HOW DOES UBSCAN WORK ?

Depending on the industry, UBscan adapts the scanning format and scans every piece of equipment which connection to the corporate network could constitute a compromise. Servers, printers, IOTs, anything with an IP address, vulnerable or not, is scanned.

UBscan identifies the weaknesses of your information systems and UBCOM helps you to remedy them.

« Thanks to UBscan, a vulnerability allowing a potential data breach was identified in our servers.

This discovery happened a few weeks before a hacker tried to find the administrators passwords. We narrowly **avoided heavy legal proceedings and damages to our reputation.** »

CIO of an SME in the health sector

WHY CHOSE UBSCAN ?

Our experts guide you through **the identification of your vulnerabilities to correct them and lower your cyber risk**. UBscan is the only tool on the market protected by the Swiss constitution and paid « by the IP ».
